

Alexey Slaykovsky
email: alexey@slaykovsky.com
github: <https://github.com/slaykovsky>

Formal Education:

- Moscow Technological Institute BS of CE

Certificates:

- RHCVA
- Coursera certificates (a lot of them, you could find them on LinkedIn page)

Bio:

Hi! I'm Alex and I'm pretty much excited you're reading my CV :)

I have a passion for open source software because it makes a world a really better place. I do work hard and also I do learn new things every day and I very like it. I practice transcendental meditation to keep my storming mind in peace.

Experience:

Red Hat (Czech Republic, Brno) August 2016 - Now

Automation QE (ovirt coresystem)

Integration testing. Fighting dragons. A lot of Python 2 development - refactoring, features development (mainly new integration testing of features of ovirt), code review. Here I also contribute into open source projects I use such as ovirt, kubevirt and so on.

Postgres Professional (Russia, Moscow) August 2015 - April 2016

Infrastructure Developer (Jack of all trades, master of none)

I did shell, Python and C programming (PostgreSQL extensions and fighting with bugs), wrote a lot of rpm specs and deb rules. And Perl for build farm ;(So the main responsibility of mine was a build system in top of Docker for a bunch of (19) Linux distributives including Russian certified Linux systems. Also, I've done Windows batch scripts for building PostgreSQL and it's dependencies so as NSIS installers.

MARS LLC (MARS ISS) (Russia, Stupino) June 2015 - August 2015

Analyst COE SCO (Outbound)

Data analysis with Python and PostgreSQL. Chocolate eating (A LOT).
